CONCLUSION

ABOUT

The summer of 2021 has seen an explosion in the popularity of gamified crypto projects. Axie Infinity, Crypto blades and Mist amongst others saw huge gains in the space of a few months. Whilst successful they all have one flaw in common... they are all overly complex for your average Joe.

Introducing... **Doge Dash!**

Doge Dash is a Mario Run inspired game where anyone can earn coins through skilled gameplay and contributions to the ecosystem. The aim of the game is simple- Dash as fast as you can through all of the 10 levels whilst collecting coins along the way. Successful players who complete all levels will be rewarded with the collected coins direct to their wallets. Simple.

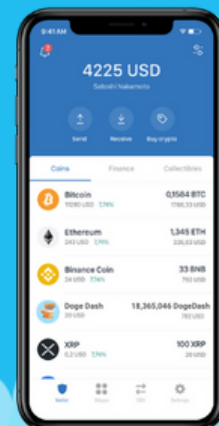

GAMEPLAY

Doge Dash features 10 fun, fast paced levels with the degree of difficulty increasing as the player progresses. Players must Dash over and under platforms, monsters and even a zombie infested City to reach the Dog House and complete the game.

Each "Dash" costs the player 100 Doge Dash coins to enter. These coins are re-distributed into the Game Rewards wallets to keep it replenished for future players.

A total of 10,000 coins are available across each Dash, if a player reaches the dog house at the end of level 10 the collected coins are then deposited into their Crypto Wallet and tradeable instantly.

NFT COLLECTION

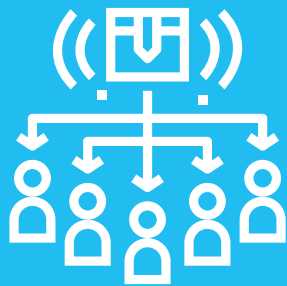

The fun, lovable characters from the game will be available as unique, collectable NFTs.

Each sprite is hand drawn with meticulous detail by our team of artists to ensure the highest level of detail

TOKEN UTILITY

#DogeDash is the native token used in the game.
It employs 3 simple yet effective functions:

Re-Distribution:
3% of each transaction is
re-allocated to holders

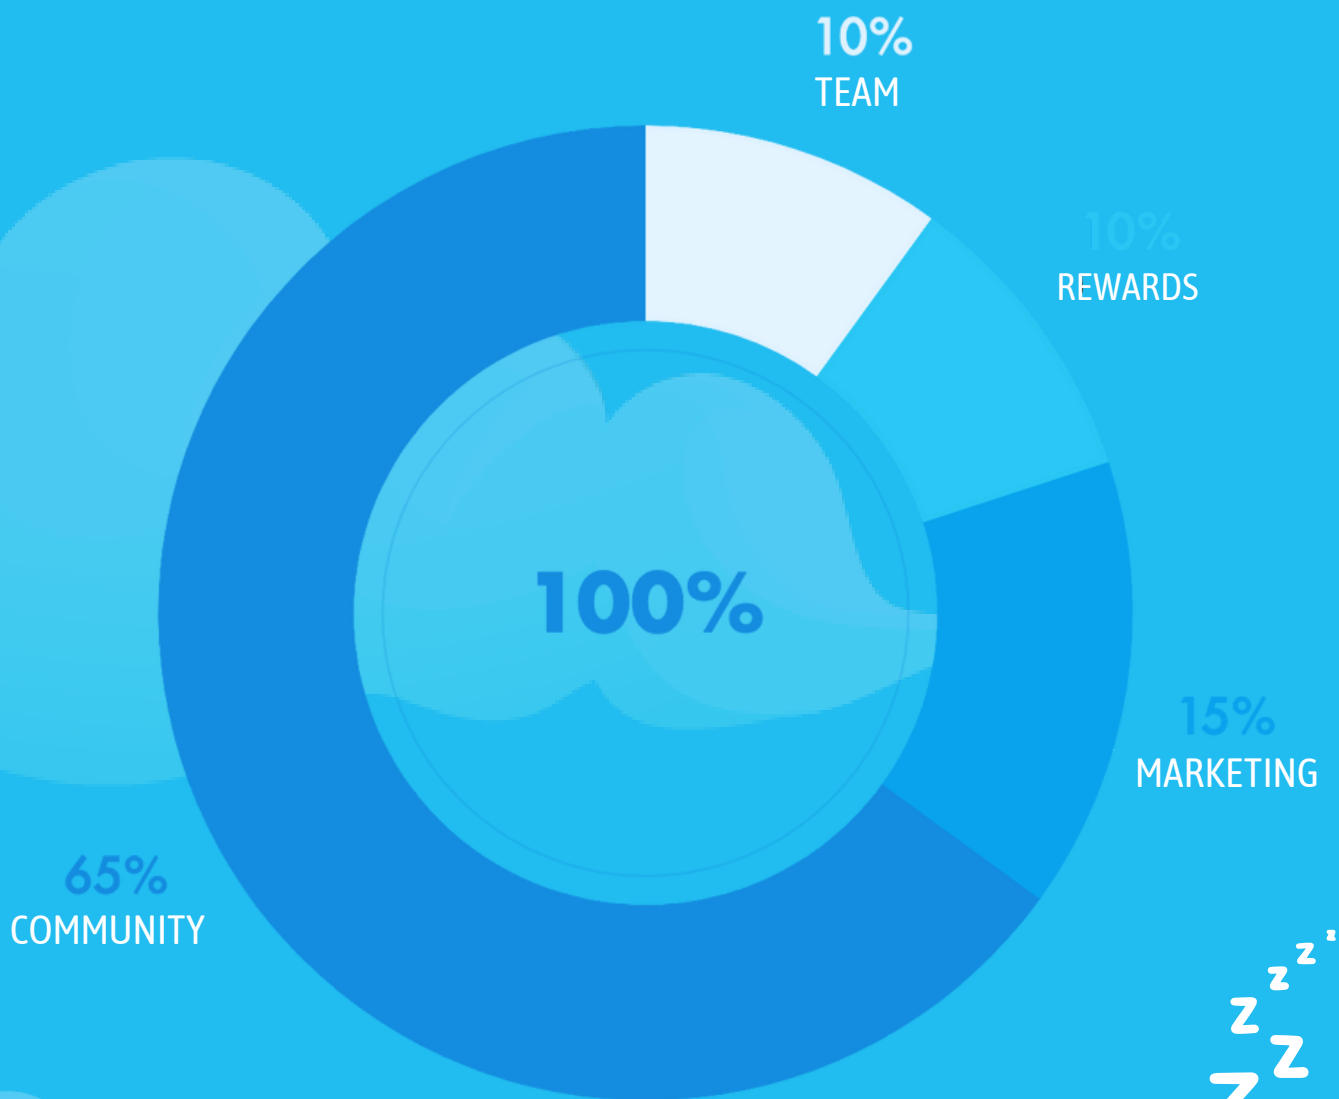

Deflationary:
3% of each transaction is burned so
that the coins in your wallet become
more valuable over time

Marketing:
3% of each transaction is spent
directly on marketing to help raise
awareness and encourage mass
adoption

COIN DISTRIBUTION

Total Supply: 100,000,000,000
